Message from the Associate Dean and Director of the School of Nursing at McMaster University

The School of Nursing has a long tradition in providing leadership to support the development of advanced practice nursing roles through advocacy, education, and research. In the 1970's, Dorothy Kergin who was the Associate Dean at the time, lobbied actively to initiate the first primary health care nurse practitioner program in Ontario. In the 1990's, Alba DiCenso led research to support the introduction of the Neonatal Nurse Practitioner Program and the re-launch of the Primary Health Care Nurse Practitioner role in Ontario. Between 2001 and 2011, she expanded this work nationally through the CHRSF/CIHR Chair Program in Advanced Practice Nursing.

Since 2011, the Canadian Centre for Advanced Practice Nursing Research (CCAPNR) has continued and expanded on the APN Chair program to lead a research, education and knowledge translation enterprise with provincial, national and international impact. A major strength of CCAPNR's impact and reach is the commitment and collaboration amongst the faculty who represent five universities across three provinces. The breadth of CCAPNR's impact is impressive. CCAPNR initiatives extend across five continents and reach almost every province in Canada. Research has examined the introduction and impact of Clinical Nurse Specialist and Nurse Practitioner roles in primary health care, acute care, long-term care, and chronic health conditions such as diabetes and cancer. Through partnerships and relationships with health care decision-makers and effective knowledge translation interventions, research findings have informed the development of policies and practices to support advanced practice nursing at organizational, provincial, national and international levels. CCAPNR has also created a host of evidence-based frameworks, tools and resources to promote and improve research in this field. Graduate students and post-doctoral fellows have benefited from innovative research training opportunities and faculty have contributed to the development of advanced practice nursing in Canada and other countries. Novel academic and clinical practice partnerships have been established to build capacity among advanced practice nurses to conduct point-of-care research. As leaders in their field, CCAPNR faculty are frequently sought out as keynote speakers at conferences and policy forums around the world and they have consistently demonstrated a high level of productivity in peer reviewed publications and presentations.

I congratulate CCAPNR and its faculty and staff on their accomplishments over the last five years and look forward to their future success in the years ahead!

Message from the Canadian Nurses Association

For the past five years, the Canadian Centre for Advanced Practice Nursing Research (CCAPNR) has led research that optimizes the role of registered nurses (RNs) and advanced practice nurses in Canada and internationally. CCAPNR also supports RNs and advanced practice nurses to generate new evidence that has enhanced and benefited nursing practice and the health of Canadians.

The Canadian Nurses Association (CNA) believes that evidence informed decision-making is essential to optimize outcomes for patients, improve clinical practice, achieve cost-effective nursing care and ensure accountability and transparency in decision-making. Ongoing research by groups such as CCAPNR as investments in nursing are essential to build and test new solutions for nursing. CCAPNR research and the innovative ideas that it spawns support the health system and Canada's economic advantage by developing and evaluating new, more cost-effective approaches to health promotion and protection, health-care delivery and disease management.

CNA has collaborated and continues to work with CCAPNR on the development of research and policy in the area of primary health care, and integration of registered nurses, nurse practitioners and the clinical nurse specialist role in Canada. In 2011, CCAPNR led the first Canadian Clinical Nurse Specialist Practice Patterns Study. This study examined the practice patterns of CNSs in Canada. A clearer understanding of CNS roles in Canada, the number that exists, where they practice, and the barriers to and facilitators that influence their role development and implementation was explored. This evidence provided the Canadian nursing community with much needed information about CNSs in Canada. Such knowledge forms the foundation for work to effectively utilize the CNS role in the Canadian health care system, and facilitate communication about the CNS role with key stakeholders groups (e.g., employers, government, and policy makers) to better integrate the CNS role into interprofessional teams. In 2013, CNA and CCAPNR partnered to summarize the issues and policy options that inform CNA's future role and strategies for advancing a pan-Canadian primary care framework that optimizes the role of registered and advanced practice nurses in primary care interprofessional teams. Research, practice, education, and policy information and input from key stakeholders relevant to nursing roles in the delivery of primary care services from national, provincial and territorial perspectives was synthesized to provide policy guidance and actionable recommendations.

It is nursing research by CCAPNR that has identified and created evidence to improve public access to quality health care, and improved cost efficiency and function – attributes that are needed today more than ever, given changing demographics and the global economic climate. It is no surprise, then, that such research has created the environment and culture for expanding RNs and APN roles in Canada including: improving nursing practice and care delivery through integrated role activities related to education, research, organizational leadership, and scholarly and professional development.

CCAPNR excels in its focus to increase Canada's capacity of nurse researchers for the creation of a comprehensive, integrated, national applied nursing research programs that serve the needs of local, regional, provincial, national and international levels to address: Education and Mentoring, Research, and Linkage and Exchange. CNA is pleased to acknowledge CCAPNR on its fifth anniversary!

Introduction

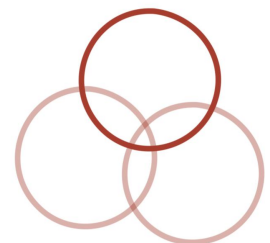

The Canadian Centre for Advanced Practice Nursing (CCAPNR) is Canada's foremost research unit devoted to advancing the field of advanced practice nursing (APN) and specialized nursing roles and practice. Regarded as a leader in APN research, policy and knowledge transfer, CCAPNR has worked hard to distinguish itself nationally and internationally as a centre of excellence that conducts research and evaluation, provides mentorship to clinicians and junior researchers, and works collaboratively with organizations and decision makers to inform health policy.

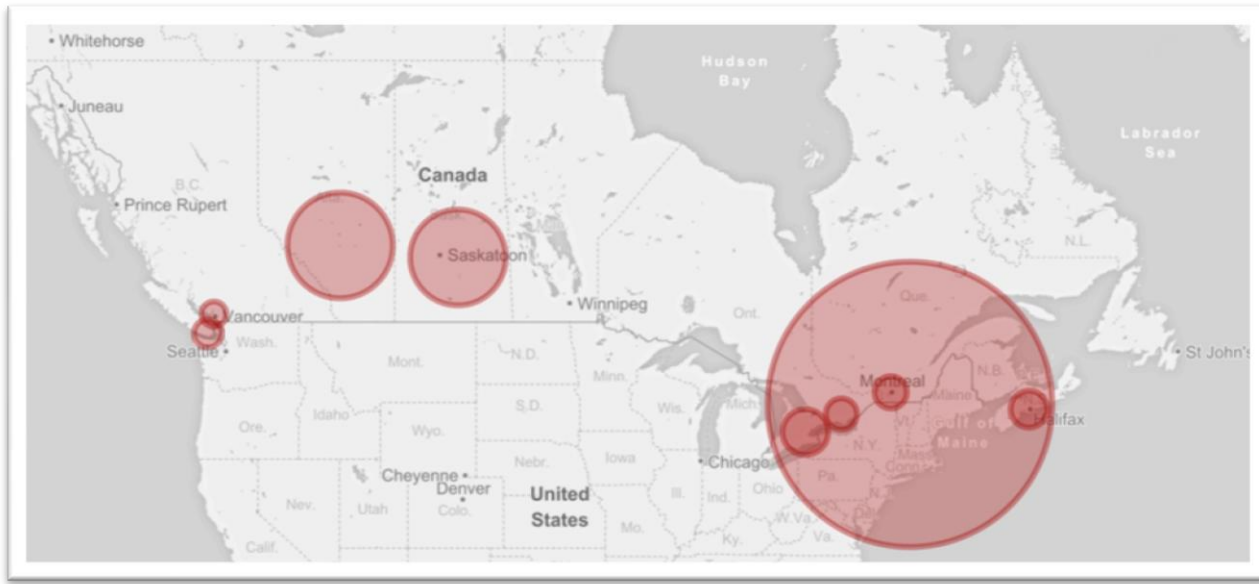

This report highlights the activities and accomplishments of CCAPNR from 2010 to June 2016. In this document we also reflect on what we have learned as an alliance and chart future directions for CCAPNR.

History

CCAPNR evolved from the Canadian Health Services Research Foundation/Canadian Institutes of Health Research (CHSRF/CIHR) Chair in Advanced Practice Nursing (APN) Program. The CHSRF/CIHR Chair program was a 10-year award co-sponsored by the CHSRF/CIHR and the Ontario Ministry of Health and Long-Term Care (2001-2011).

The Chair program's mandate was to increase Canada's capacity of nurse researchers who would conduct applied research related to APN that served the needs of the local, regional, provincial, national and international levels to address education and mentoring; research; linkage and exchange.

Who We Are

We are a group of multi-disciplinary researchers dedicated to creating new solutions for problems that challenge health and social services through the use of new models of care and evaluation. Our research team is based at McMaster University in Hamilton, Ontario and includes faculty from Dalhousie University, Ryerson University, Queen's University, Western University, and Université de Montréal.

CCAPNR works with a range of stakeholders and community partners including federal and provincial governments, health care organizations, and research units working both nationally and internationally. The above map identifies stakeholder and partnership reach in Canada over the last five years.

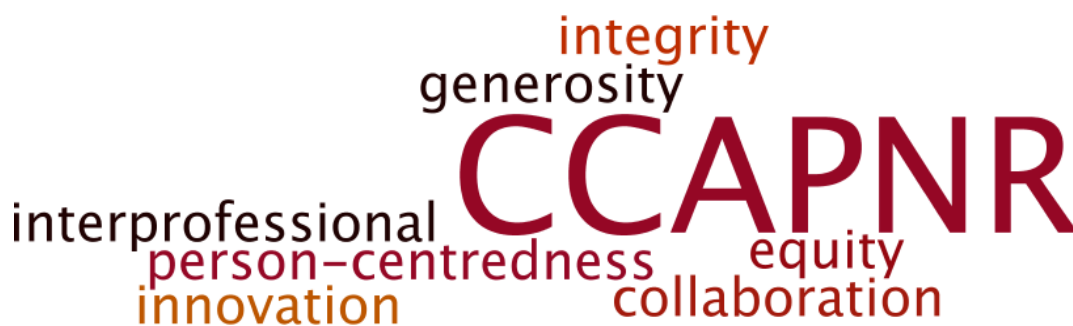

Our Vision

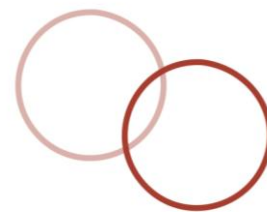

Through research and leadership, and in partnership with national and international stakeholders, we will improve health and health services by advancing the nursing care provided to society.

Our Mission and Values

To improve health and the delivery of accessible and sustainable evidence-informed nursing and healthcare services through research, education, mentorship and knowledge translation that strengthens the contribution of nursing and advanced nursing roles in Canada and beyond.

We value innovation, equity, person-centredness, interprofessional collaboration, generosity and integrity in all of our work.

The First 5 Years - Goals and Objectives

Goals	Objectives
<ul style="list-style-type: none">•To provide a national forum to identify, discuss, consult and debate on important issues relevant to the education, development, and utilization of generalist, specialized and advanced nursing roles in Canada.•To conduct timely, responsive and meaningful interdisciplinary and cross-jurisdictional research that informs decision-making about the education, development and utilization of generalist, specialized and advanced nursing roles in Canada.•To lead a broad range of knowledge translation activities that support the design, conduct, dissemination and utilization of high quality research about nursing roles and models of care delivery in Canada.•To support the development of advanced nursing roles and related research through consultation with key stakeholders and the education and mentorship of undergraduate and graduate students, advanced practice nurses and junior researchers.	<ul style="list-style-type: none">•To provide a national forum to identify, discuss, examine and debate important issues relevant to the integration of specialized and advanced nursing roles in Canada.•To improve patient health, quality of care and healthcare utilization and costs through research and knowledge translation activities that inform nursing practice and the effective use of specialized and advanced nursing roles in chronic disease management in collaboration with provincial, national and international stakeholders.•To promote faculty and staff development through education and external consultation and guidance for the development of new or ongoing research or other related initiatives.•To provide national stakeholders with consultation and guidance on the development of new or ongoing research or other nursing and APN related initiatives. To provide and maximize the use of staff and practical resources to support the conduct of research and knowledge translation activities.•To provide opportunities to promote stakeholder understanding of the effective development and use of specialized and advanced nursing roles through education and other knowledge translation activities.•To provide a forum for manuscript review and development and the submission of abstracts for peer reviewed presentations.•To promote team collaboration, cooperation, and support for joint research.

CCAPNR Members

Denise Bryant-Lukosius

Focus: Improving access and quality of care and health outcomes for underserved populations through the optimal implementation and evaluation of specialized and advanced nursing roles.

Impact: As co-Director, Dr. Bryant-Lukosius has led the expansion of CCAPNR and its work related to the national and international development of advanced nursing practice. Through research, she has developed evidenced-based tools that are used around the world to improve APN role implementation and evaluation. As Director for the Canadian Centre for Excellence in Oncology Advanced Practice Nursing (OAPN) at the Juravinski Hospital and Cancer Centre, she has conducted research to improve the delivery of cancer symptom management and survivorship care and led provincial and national APN mentorship and education initiatives to build research capacity and support role development.

Ruth Martin-Misener

Focus: Evaluation of the implementation and outcomes of innovative models of team-based care with a particular focus on advanced and specialized nursing roles in primary health care and long-term care.

Impact: Dr. Martin-Misener is an experienced nurse practitioner researcher and educator with a focus on improving the accessibility and quality of primary health care. She has published or in-press 75 articles in peer-reviewed journals as well as numerous technical reports. She has been actively involved with implementation of the nurse practitioner role in Canada for almost two decades serving on many provincial and national committees related to nurse practitioner education, practice and regulation. As co-Director of CCAPNR, she has contributed to development of the CCAPNR team and its research and knowledge translation work.

Nancy Carter

Focus: Systems navigation, knowledge translation and exchange, and nursing leadership.

Impact: Dr. Nancy Carter holds expertise in knowledge translation and has a focus is on the dissemination and uptake of evidence on clinical nurse specialists and nurse practitioners by administrators and decision makers, as well as the development of new nursing roles in oncology and community settings. Her experience working with diverse stakeholders are a valuable asset to the CAPPNR team's knowledge translation objectives.

Faith Donald

Focus: Nurse practitioners in primary and long-term care, nurse practitioner graduate education, economic analysis of APN roles, and evidence-based practice

Impact: Dr. Faith Donald brings extensive experience with curriculum design and evaluation to the CCAPNR team. Dr. Donald continues to practice as a primary health care nurse practitioner and has a background that stretches across acute, long-term and primary health care settings.

Patti Harbman

Focus: Academic practice partnerships

Impact: Dr Patti Harbman is a vital academic link in delivering graduate research courses to point-of-care advanced practice nurses at Trillium Health Partners hospital network in the Greater Toronto Area. Her background includes working as a nurse practitioner in diverse settings; managing patients with heart conditions in acute and ambulatory care, as well as working in emergency, and walk-in clinics.

Kelley Kilpatrick

Focus: Policy affecting nurse practitioners in long-term care, clinical nurse specialist roles, intra- and inter-professional/teamwork

Impact: Dr. Kelley Kilpatrick's research involves nurse practitioner and clinical nurse specialist roles, boundary work activities, perceptions of team effectiveness, acute and primary care, and the effects of healthcare service delivery on patients and families. Dr. Kilpatrick applies a dynamic set of research methodologies in her work; using mixed methods, case study, surveys, systematic reviews, and qualitative description to answer her research questions.

Diana Sherifali

Focus: Diabetes coaching and advanced practice roles

Impact: Dr. Diana Sherifali research interests include the evaluation of strategies to facilitate diabetes self-care and its consequences for patients, providers and policy makers. She is recognized nationally and internationally for her extensive clinical experience and research.

Joan Tranmer

Focus: Health services research, process and outcome measurement using administrative data, chronic disease prevention and management.

Impact: Dr. Joan Tranmer builds upon her substantive clinical leadership and research experience and work with interdisciplinary teams to conduct research that focuses on systematic examination of patient, caregiver and system outcomes for persons living with chronic conditions.

Ruta Valaitis

Focus: Navigation, public health, primary health care, collaboration, and health systems integration

Impact: Dr. Ruta Valaitis' research contributions straddle a variety of content areas essential to contemporary approaches in the public health and primary health care sphere (policy research, interprofessional collaboration, implementation science, community-based care, and e-health). Dr. Valaitis' experience in implementing public health policy in British Columbia and Ontario exemplify her experience in managing large interprovincial, inter-disciplinary teams, measuring impacts, and integrating knowledge exchange processes within the health care policy sector.

Research Trainees

Linda Brousseau

- Nurse Practitioner, Halton Public Health. 2015 – 2015
- PHD student, 2016 -2020

Diane Campbell

- Assistant Professor, College of Nursing, University of Saskatchewan, 2013

Kristia Jokiniema

- Postdoctoral Fellow, University of Eastern Finland, 2015-2017

Jennifer Rayner

- Adjunct Faculty, Health Sciences and Family Medicine, Western University
- Postdoctoral Fellow, Ryerson University, 2014 - 2016

Lindsay Yuille

- MSc Graduate Nursing Student, McMaster University, 2014

Accomplishments

This section outlines the following accomplishments of CCAPNR.

- Funded research and contracts
- Contracted research capacity building initiatives
- Publications and other knowledge transfer activities
- International and national collaboration and impact
- Contributions to graduate education about APN (beyond expected teaching roles)
- Awards and recognitions

Funded Research and Contracts

CCAPNR has seen steady grant and contract capture, commissioned projects and increased diversification in funding sources over time. Over the past five years CCAPNR members were awarded 27 peer-reviewed funded research grants totalling \$4,787,265.11. During that same time, CCAPNR members were awarded 10 commissioned or contracted research or policy-focussed projects and research capacity building initiatives. The full amount of dollars supporting CCAPNR projects during these five years, from all sources, was \$5,303,983.70. See Appendix A for a complete list of funded projects. While this report focuses on the past five years, we have included some projects funded before 2010 but with continuing work extending into the ensuing years. An example of this is the systematic review of the cost-effectiveness of NPs and CNSs, which resulted in seven peer reviewed publications and several presentations.

Contracted Research Capacity Building Initiatives

Trillium (2014, 2016-2019)

The Trillium project involves an academic-practice partnership created between healthcare administrators and advanced practice nurses at Trillium Health Partners and researchers at the Canadian Centre for Advanced Practice Nursing Research (CCAPNR) at McMaster University. The purpose of this partnership is to provide an innovative approach to educate and mentor health care professionals in leading and conducting point-of-care research, quality improvement (QI) or evidence-informed decision making (EIDM) projects. The project includes face-to-face classes, and one to one mentorship of advanced practice nurses who develop a research, QI, or EIDM proposal and present it to their peers and employers.

Course materials were prepared for students to support self-directed learning. Students could access course resources digitally via a hospital library website (set-up in collaboration with Trillium Health Partners librarians), or in physical formats on-site.

Students participate in small group activities during a teaching session.

“Great course; enjoyed class discussion and appreciate the opportunity to present. Provides opportunity to practice for real-life scenarios and develop confidence in doing/applying research into practice.”

- Research Course Participant

Alberta Rose (2015-2016)

The Alberta Rose project involves an academic-practice partnership created between healthcare administrators and advanced practice nurses at Alberta Health Services and researchers at CCAPNR at McMaster University. The aim of the Alberta Rose project is to enhance Alberta Health Services (AHS) oncology APNs' knowledge, skills and confidence in the design, implementation and/or evaluation of a QI, EIDM or research project to improve patient, provider and/or system outcomes relevant to their clinical practice. The project includes face-to-face and distance classes, and one to one mentorship of advanced practice nurses who develop a research, QI, or EIDM proposal and present it to their peers and employers.

Alberta Rose project participants and course facilitators.

“[The course] has given me the confidence to take the 1st step in performing research. I feel fortunate for having the CCAPNR team guide me through this journey, and keep me motivated!!!!”

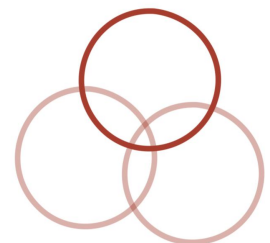

- Research Course Participant

Publications and Other Research Transfer Activities

The research transfer activities highlighted in this section include: peer reviewed publications; non-peer reviewed publications and reports; peer reviewed presentations; invited keynote presentations; and knowledge translation (KT) tools. As Table 1 shows, the number of annual publications and presentations are increasing over time and the number of KT tools is steady. CCAPNR members are publishing in high impact journals that reach diverse audiences and presenting at peer-reviewed conferences and as invited presenters at national and international venues. Many of the articles published by CCAPNR members consistently are among the top ten downloaded articles by publishers such as Longwoods and citation platforms such as *academia.edu*. See Appendix B for a complete list of items in each research transfer activity.

International and National Collaboration and Impact

Over the past five years, CCAPNR's research and evaluation and knowledge transfer activities and products have made a substantial contribution to APN role introduction, implementation and sustainability. CCAPNR has completed or is currently involved in policy, practice, education and research initiatives with organizations at the national level and at least seven Canadian provinces. Internationally, our team has provided consultation, education and leadership to international organizations and in at least eight countries. CCAPNR's knowledge translation tools and research evidence are being used around the world. Specific initiatives and contributions are outlined in the following pages (19 - 22).

National Collaboration

2010

Bryant-Lukosius, D.

Co-Chair: Ontario Oncology APN Community of Practice, Cancer Care Ontario.

Martin-Misener, R.

Member: Nurse Practitioner Competencies and Standards Working Group, College of Registered Nurses of Nova Scotia.

Led to revised standards and competencies for NPs in NS, available at:

http://crnns.ca/wp-content/uploads/2015/02/NS_NP_Competency_Framework.pdf

2011-2012

Bryant-Lukosius, D.

Vice Chair: Models of Care Initiative – Prediction and Planning Committee Working Group, Cancer Care Ontario.

Martin-Misener, R. Donald, F., et al.

Co-Chair, Member:

NP Education Task Force, Canadian Association of Schools of Nursing. Led to the development of *Nurse Practitioner Education in Canada- National Framework of Guiding Principles and Essential Components*, available at: <http://casn.ca/wp-content/uploads/2014/12/FINALNPFrameworkEN20130131.pdf>

2012

Martin-Misener, R.

Member: Joint Controlled Drugs and Substances Advisory Committee, College of Registered Nurses of Nova Scotia. Led to standards, policies and education for NPs in NS. <http://crnns.ca/practice-standards/standards-of-practice/>

Martin-Misener, R.

Member: Jurisprudence Stakeholder Group, College of Registered Nurses of Nova Scotia. Led to the development of jurisprudence examinations for RNs and NPs.

<http://crnns.ca/registration/licensing-exams/jurisprudence-exams//>

2013-2016

Martin-Misener, R.

Elected Chair: NP Educator Interest Group, Canadian Association of School of Nursing. Led to development of task forces related to NP education, NP controlled drugs and substances prescribing and a survey of NP programs regarding student preceptorship.

2014

Bryant-Lukosius, D.

Nominated Member: Clinical Nurse Specialist Competencies Steering Committee, Canadian Nurses Association.

Bryant-Lukosius, D.

Member: Canadian Association of Schools of Nursing (CASN) Master's Education Committee on Advanced Practice Position Statement

Bryant-Lukosius, D.

Consultant and workshop leader: Implementation and Evaluation of Nurse Practitioners in Cancer Care.
British Columbia Cancer Agency, Victoria, B.C.

2014-2015

Donald, F., Kilpatrick, K., Martin-Misener, R. et al.

Members: Nurse Practitioner Practice Analysis Research Advisory Committee, Council of Registered Nurse Regulators.
Resulted in a national practice analysis of NPs.
<http://www.ccrnr.ca/nurse-practitioners.html>

2014-2016

Bryant-Lukosius, D

Member: Patient Reported Outcomes Advisory Committee, Cancer Care Ontario.

2015

Bryant-Lukosius, D.

Consultant and workshop leader: *Implementation and Evaluation of Nurse Practitioners in Cancer Care.*
British Columbia Cancer Agency, Vancouver, B.C.

Martin-Misener, R.

Member: Controlled Drugs and Substances Prescribing Evaluation Working Group, College of Registered Nurses of Nova Scotia. Led to *development of an evaluation plan.*

2015-2017

Martin-Misener, R.

Co-Chair: Advisory Committee for Development and Mobilization of Appropriate Prescriber Practice Competencies for Controlled Drugs and Substances into Nurse Practitioner and Registered Nurse Educations, Canadian Association of Schools of Nursing. Led to development of *Nurse Practitioner Education Competencies for Prescribing Controlled Drugs and Substances.*
<http://www.casn.ca/education/np-prescribing-of-controlled-drugs-and-substances/> and an e-resource program for NP education programs

International Collaboration

2011

Bryant-Lukosius, D.

Consultant: Needs assessment to develop oncology nursing roles, graduate oncology nursing education and research.

University of Calgary, Doha, Qatar.

Bryant-Lukosius, D. & DiCenso, A.

Faculty: Promoting research and evidence based practice amongst advanced practice nursing students, graduates and faculty.

College of Medicine and Nursing, Hungkuang University, Taiwan.

2012

Bryant-Lukosius, D.

Consultant: Site visit with meetings with senior health care administrators, advanced practice nursing faculty and researchers at the Institute of Nursing Science, University of Basel and University Hospital. Basel, Switzerland.

2013

CCAPNR.

Host: One day meeting with International Council of Nurses, President, Dr. Judith Shamian.

Participated in multiple follow-up information requests and teleconferences to provide summaries of CCAPNR and other research evidence and guidance for ICN policies and initiatives related to the international development of APN roles.

Bryant-Lukosius, D.

Project Lead: Development of an evidence based framework for evaluating the introduction of advanced practice nursing role in Switzerland.

University of Basel, Switzerland.

2014

Bryant-Lukosius, D.

Participant and presenter: Global Advanced Practice Nursing Learning Invitation-Only Symposium.

Robert Wood Johnson Foundation and the National Nursing Centers Consortium
Philadelphia, Pennsylvania, USA. July 28-29, 2014.

2015

Baumann, A., Valaitis, R., Bryant-Lukosius, D., Martin-Misener, R., Carter, N., & Donald, F.

Presenters and group leaders: Pan-American Health Organization. Universal Access to Health and Universal Access to Health Coverage: Advanced Practice Nursing Summit. 2-Day Workshop.

Hosted by Global Health Program, WHO Collaborating Centre, School of Nursing and Canadian Centre for APN Research, McMaster University. April 14-17, Hamilton.

Bryant-Lukosius, D., Donald, F., Martin-Misener, R., & Carter, N.

Co-Leads: *Comparative analysis of education curricula and nurse practitioner competencies in five OECD countries*. Collaborators: Dr. E. Johansen, Professor and O. Egilisdottir, Professor, Department of Nursing Science, Buskerud & Vestfold University, Drammen, Norway; Dr. P.F. Roodbol, Professor, University Medical Center Groningen, The Netherlands; Dr. Glen Gardner, Professor and Margaret Adams, Doctoral Student, Queensland University of Technology, Brisbane Australia; and Dr. J. Honig, Professor, School of Nursing, Columbia University, New York, United States.

Valaitis, R., Bryant-Lukosius, D., Donald, F., Martin-Misener, R., & Sherifali, D.

Members: Pan American Health Organization of the World Health Organization - Advanced Practice Nursing Implementation. Webinar Series Taskforce.

2016

Bryant-Lukosius, D.

Consultant: provided consultation on APN implementation and led development of an evaluation framework in Switzerland.

Resulted in published article:

Contributions to Graduate Education about APN (beyond expected teaching roles)

CCAPNR members have made contributions to APN graduate education that go beyond their expected teaching roles. Called upon by academic and practice colleagues for their expertise in APN, CCAPNR members engage in these activities to disseminate information about APN. These contributions, summarized in Appendix C, typically involve presentations to graduate students in nursing and other disciplines a variety of venues in Canada and abroad.

Awards and Recognitions

2011

- Martin-Misener, R. *Centennial Award of Distinction*. College of Registered Nurses of Nova Scotia

2013

- Bryant-Lukosius, D., Israr, S., & DiCenso, A. (2013). Resources to facilitate APN outcome research. Chapter in R. Kleinpell (ed.). *Outcome Assessment in Advanced Practice Nursing, (3rd ed.)*. New York: Springer Publishing Company. Book received the American Journal of Nursing Best Books of the Year in the category of APN for 2013
- Martin-Misener, R. *65 Inspiring Minds Award*. Dalhousie University School of Nursing

2015

- Bryant-Lukosius, D. *Canadian Association of Nurses in Oncology Lifetime Achievement Award*
- Donald, F. *Excellence in Teaching Award*. Council of Ontario University Programs in Nursing, Ontario Primary Health Care Nurse Practitioner Program (9-university consortium)

2016

- Bryant-Lukosius, D. *Clinical Lectureship Award*, Canadian Association of Nurses in Oncology
- Donald, F. *Distinguished Alumnus Award*, the highest honor presented by the State University of New York, Jamestown Community College Alumni Association Board of Directors
- Martin-Misener, R. *Decade Club Award*. Nova Scotia Health Research Foundation
- Sherifali, D. *Regional Outstanding Healthcare Professional Award*. Canadian Diabetes Association

Conclusion

What We've Learned from Our Alliance

CCAPNR has evolved to become known as a leader in: APN research and evaluation; education and policy; and linkage and exchange, both nationally and internationally. Core CCAPNR members have worked closely together since 2001 with new members joining the team over the subsequent 15 years. Together we have amassed an impressive breadth and depth of knowledge regarding the implementation and evaluation of advanced practice and specialized nursing roles. Our research has spanned diverse patient populations experiencing chronic and acute health and social conditions, in a range of health care environments.

Establishing a research enterprise like CCAPNR has enabled us to build capacity to do high quality research and policy development work in a constrained funding environment that does not prioritize health services and workforce research. Despite challenging economic times for research and health care in general, we have demonstrated that we are a financially viable research enterprise. By working together we have been able to garner the capacity to lead timely initiatives that respond to contemporary policy levers for evaluations related to skill mix, economic evaluation, and models of interprofessional team-based care to promote health and address chronic illness prevention and management. Evidence of our success is seen in our impact on education and policy, our ability to obtain funding, and the outputs of our work, which include: 100 publications in high impact peer reviewed journals; 168 peer reviewed and invited presentations; and evidence-informed tools to implement and evaluate APN roles that are being used around the world. These accomplishments are made even more impressive when one considers that CCAPNR faculty member also have their own separate programs of research.

Our collaboration as a research group is evolving. We continue to learn from each other and have developed a greater comfort level in seeking peer review and support. Our journey, like all journeys, is both challenging and rewarding.

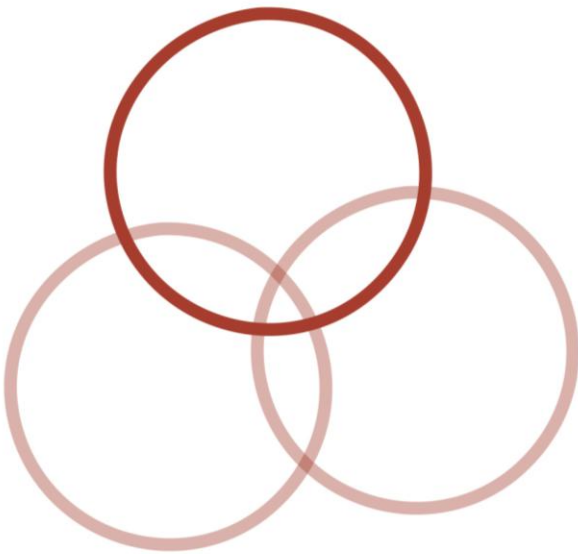

Future Directions for CCAPNR

For some time CCAPNR has identified the need to expand its membership to include researchers from other provinces/territories and provide more training opportunities for graduate students and junior researchers. At the same time, we know that establishing the infrastructure to expand CCAPNR is an objective that we must prioritize to protect the sustainability of the Centre and the quality of the work that it carries out. To enable us to move forward with expansion, we have developed CCAPNR membership criteria and a process to formalize an Advisory Council that will include decision makers, clinicians and citizens.

Looking towards the future, CCAPNR will continue to expand our international reach while maintaining the strength of involvement and influence we have in producing and translating evidence related to APN and specialized nursing in Canada. More than ever, the health needs of people world-wide require optimization of APN roles and a specialized nursing workforce.
